

Fixed Asset Management Solution

Track and Manage Fixed Assets accurately for improved asset utilization

AssetTrax automates the tracking of assets through their entire lifecycle along with installation, allocation, usage, maintenance, depreciation and disposal to enable small and mid-sized companies gain maximum value from their investments.

AssetTrax is a mobile client server solution for managing and tracking fixed and mobile assets. AssetTrax provides a simple approach to catalog all assets within an organization and enables the organization to track asset assignment, rental, transfer, depreciation, disposal and audit to protect the organization's investment and property.

AssetTrax supports the workflow of the supply chain personnel and meets the reporting needs of management through a number of highly integrated functional modules.

AssetTrax enables SCM personnel to track an asset through its entire lifecycle along with its usage, maintenance, depreciation and disposal to help the organization to gain maximum value from its investments.

AssetTrax provides a complete asset register for recording complete details of an asset prior to its allocation to an internal or external party.

With the ability to register and barcode assets, build asset systems, set categories, define sites and custom attributes for additional data, AssetTrax provides a complete asset register solution that helps it maintain the life of its assets.
