MOBILE
SOLUTIONS
DEVELOPMENT

✔ **B2B and B2C Development**
✔ **ERP and legacy Systems**
✔ **Multi-platform Development**

Mobile applications development on all leading mobile platforms including iOS, Android, Windows Phone, Windows Mobile and Blackberry.
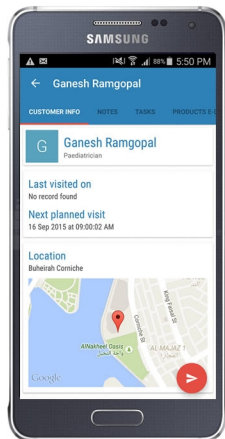

Our team is capable of delivering mobile solutions and applying platform specific best practices for both native and cross platform development tools. For cross-platform development, we specialize in Appcelerator Titanium, and Xamarin.

With our enterprise mobile solutions your field personnel can spend more of their time in the field to better serve customers, generate new business, and grow your bottom line. Proactively drive, manage and monitor your technicians through demand forecasting, workforce profiling and operational optimization.

UCS specializes in mobile solutions for field sales automation, field service automation and data capture systems. Over the years, UCS has developed products such as SalesWorx, SiteWorx, PharmaWorx, AssetTrax, which have helped customers in the FMCG, distribution, pharmaceutical and construction industries throughout the region to generate more value from their field operations.

Applications
