OUR PRODUCTS

Our core products include SalesWorx for Field Sales and Reson8 for Digital Communications.

SALES WORX

FIELD SALES AUTOMATION

- Route Inteligence
- Insights & Forecasting
- Delivery Management System

SalesWorx enhances the productivity of your in-field reps and provides you with detailed reports for effective tracking and management.

Built with a number of highly integrated functional modules, SalesWorx supports the workflow of field representatives.
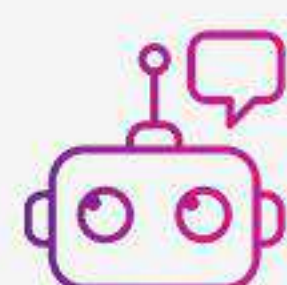

Automate your field marketing using SalesWorx to enhance the overall customer relationship.

Reson8

## OMNI-CHANNEL COMMUNICATION

- SMS/Email API
- Chatbots
- Push Notification

Reson8 is a state-of-art digital engagement platform that integrates SMS, email, chatbots, push notifications & business WhatsApp API
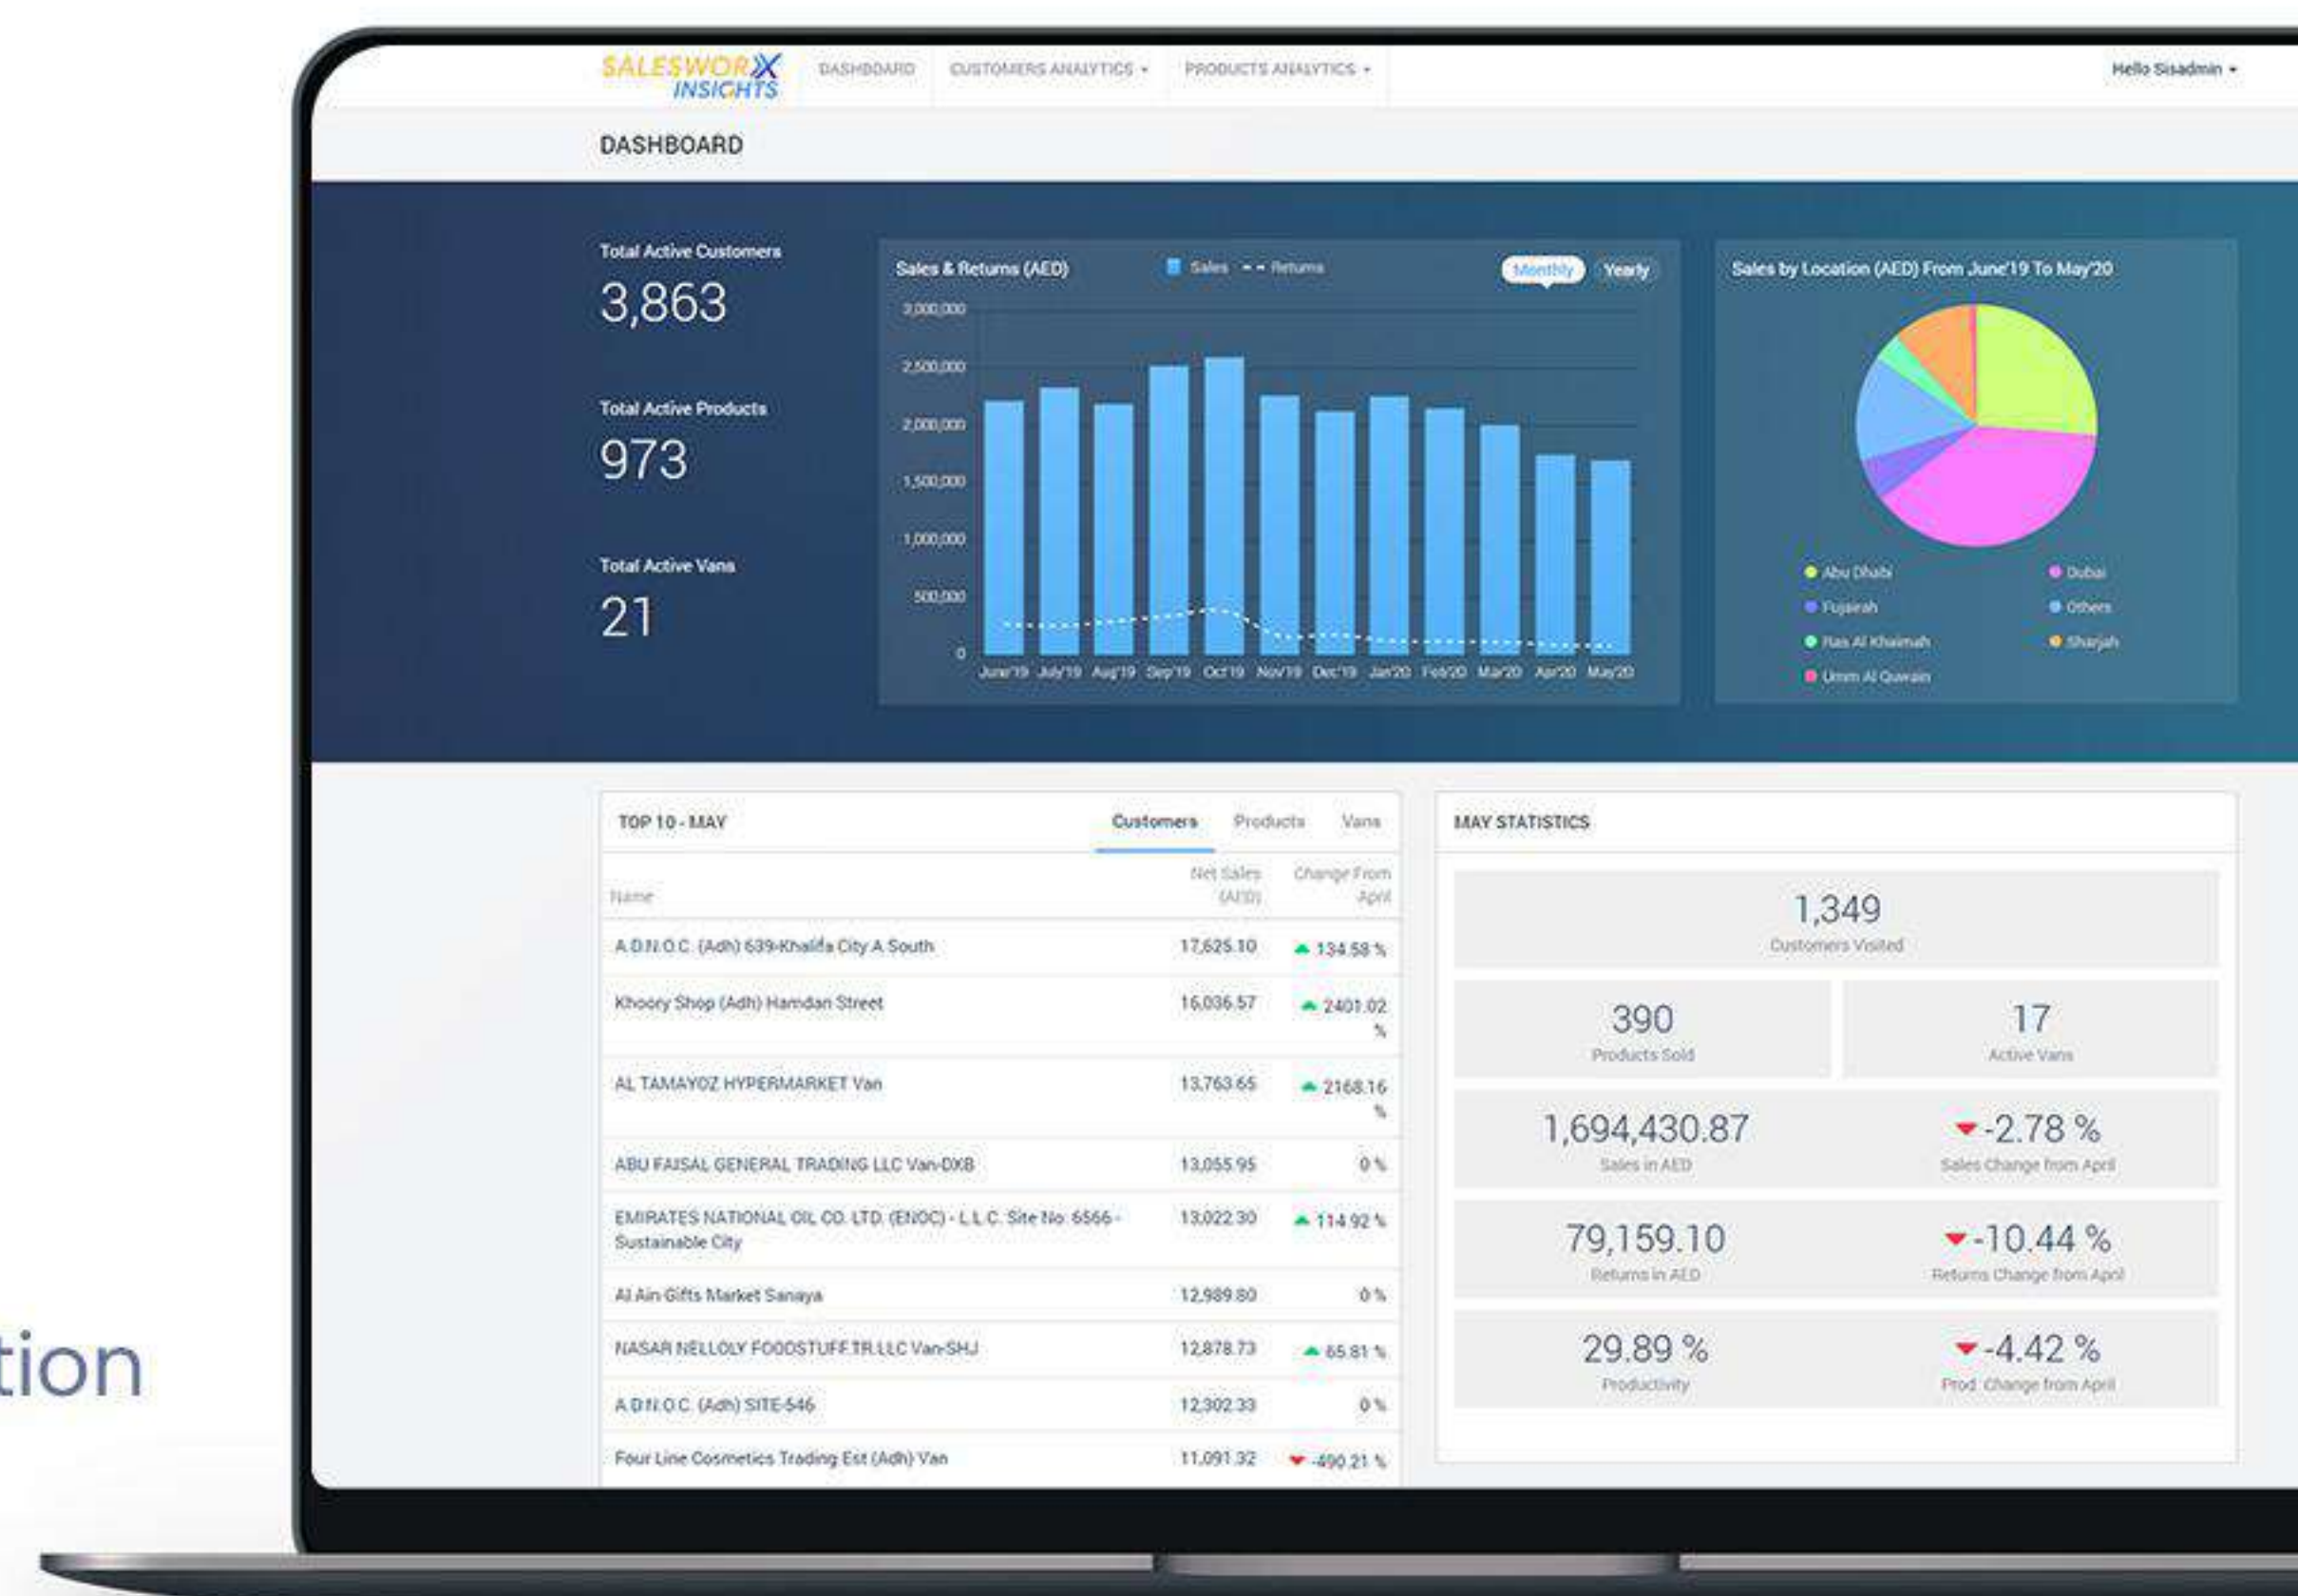

Being a complete SMS solution, Reson8 provides mobile messaging facilities using the existing infrastructure and line of business applications.

SALESWORX INSIGHTS

ADVANCED INTELLIGENCE TO IMPROVE FIELD SALES

SalesWorx Insights is an advanced intelligence application to enhance your field sales.

SalesWorx Insights helps to:

— Analyze the level of customer relationships
— Determine which customers and products should have priority to achieve sales and coverage goals
— How customers are responding to the sales teams
— Which products and brands are performing well in which territories
— Extract operational and business insights from the Salesworx app ecosystem

DocWorx

AUTOMATED DOCUMENT PROCESSING

| Identifies info. from documents | Tracks Changes | Creates event-based aggregations |

DocWorx is enabled with machine learning capabilities to improve the efficiency and accuracy of labour-intensive processes such as invoice processing, claims processing & more.

Developed using Machine Learning-based algorithms and Robotic Process Automation (RPA); DocWorx helps to reduce operational costs, save time, improve productivity and avoid manual errors.

AssetTraX

AUTOMATED ASSET TRACKING

| Asset Management	Asset Reporting	Asset History

AssetTrax is a mobile application solution for managing and tracking fixed and mobile assets. It is flexible & can be easily integrated into any Enterprise Resource Planning or Supply Chain Management solution for immediate and up-to-date access to business information.

AssetTrax provides a simple approach to catalog all assets within an organization and enables it to track asset assignment, rental transfer, depreciation, disposal and audit to protect the organization's investment and property.
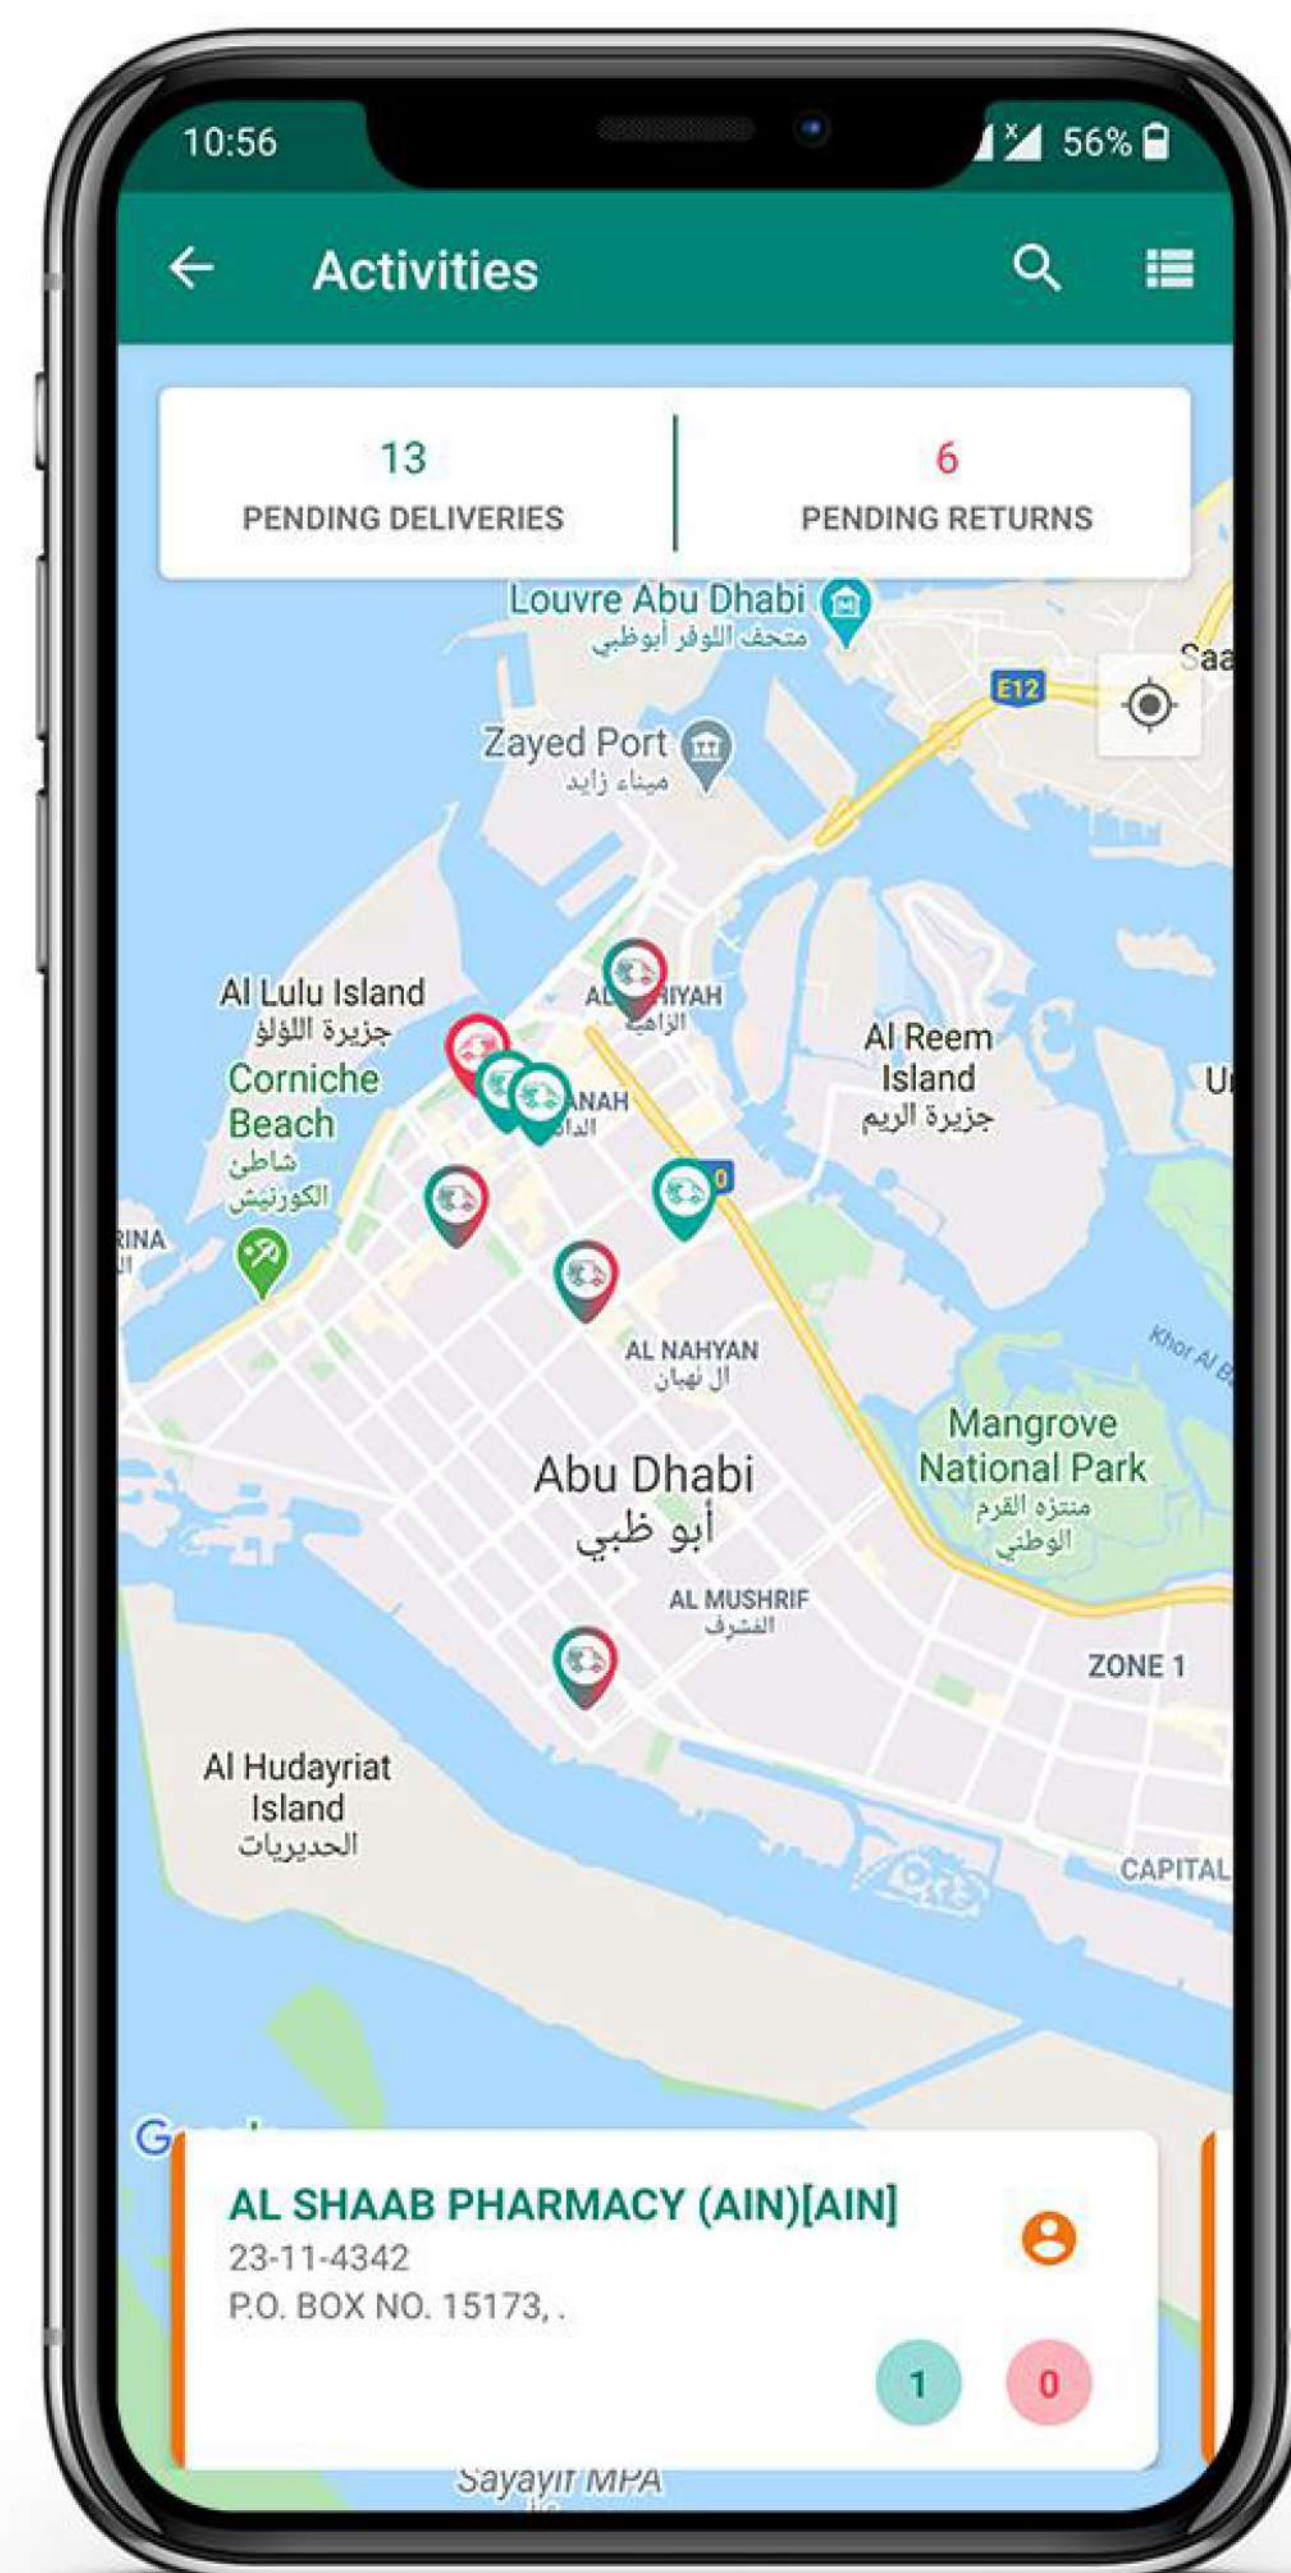

DigIsal

DELIVERY MANAGEMENT SYSTEM

DigIsal is a delivery management application that ensures the optimization of deliveries to your customers.

DigIsal supports:

• Prioritization and assignment of deliveries to your fleet with precision and efficiency

• Allocation and planning of deliveries and pickup jobs with route optimization and real-time tracking

• Provides end-to-end visibility for managing your orders and deliveries

• Secure digital signatures and geo-locations at each step of the delivery process

• Assign tasks, schedule, dispatch, and manage your orders by automating repetitive tasks

• Increase productivity
